

PIYUSH BARASKAR

piyushbaraskar4@gmail | 924478XXX | Bhopal, MP | [GITHUB](#) | [LINKEDIN](#)

First-year Computer Science student aiming to become a Machine Learning Engineer, with hands-on experience in Python, data analysis. Strong focus on problem-solving, learning ML concepts, and applying them.

EDUCATION

Technocrats Institute of Technology - Btech - CSE
2025 - 2029

PROJECTS

Image Data Analyzer - **December 2026**

- This project performs a low-level statistical analysis of digital images using Python, NumPy, and PIL, without relying on high-level image processing libraries for understanding image data numerically by examining pixel distributions, color channel behavior, brightness, and histogram-based intensity segmentation.

Quick Notes - **May 2026**

- Built an AI-powered learning assistant using Python, Streamlit, and Gemini API to generate concise notes, summaries, and key insights from PDFs, links, and raw text
 - Implemented automated cross-questioning functionality to evaluate user understanding through content-based assessment.
 - Designed an interactive Streamlit interface for real-time content processing and personalized learning workflows.
-

RELEVANT EXPERIENCE

May 2026

Hackathon Project — Student Market Place

- Built a campus-focused marketplace enabling students to buy, sell, rent, exchange, and request items within verified college communities.
- Developed real-time buyer-seller communication with instant messaging, product status tracking, and seamless interaction workflows.

GIRLSCRIPT SUMMER OF CODE 2026 - CONTRIBUTOR

May 2026

- Contributing to GirlScript Summer of Code 2026 by actively working on open-source projects, resolving issues, and implementing feature enhancements across multiple repositories
-

TECHNICAL SKILLS

- Languages - Python , SQL, C++, C
- Tools - GIT, Github, Jupyter Notebook, MySQL
- Libraries and framework - Numpy, Pandas, Matplotlib, Seaborn, Tkinter
- Concepts - OOP ,Data Structures & Algorithms, Feature Engineering, Prompt Engineering
